LOW	

Forecast Continued:

Synopsis & Discussion

Forecaster: –R. Nicoll

No major changes to the forecast. Isolated thunderstorm activity during the afternoon hours will continue to be possible through most of the forecast period. With the potential for thunderstorms also comes the potential for gusty outflow winds. Fortunately, all the recent rain will prevent dust from being a significant concern. Therefore, the dust risk is forecast to remain Low through the forecast period. Check back tomorrow for the next update. Until then, have a great day!
