<b>Monday 7/31/2017</b>	<b>Winds:</b> Afternoon westerly winds 5-15 mph. <b>Stagnation:</b> Morning stagnation.
<b>LOW</b>	

# Forecast Continued:

## Synopsis & Discussion

Forecaster: –M. Graves

The monsoon will remain in a relative lull through at least Thursday or Friday, as winds and moisture levels stay unfavorable for thunderstorms in the Valley. However, thunderstorm chances increase by Saturday and are expected to stay elevated through at least Sunday. We still can't completely rule out the possibility of thunderstorm outflows reaching the Valley in the meantime. Overall, the risk for dust will continue to be Low due to recent rain and the lack of significant thunderstorm outflows in the foreseeable future. Check back tomorrow for the next outlook.
