Wednesday 5/31/2017 LOW	Winds: Southwesterly winds 10-15 mph Stagnation: Morning stagnation

Forecast Continued:

Synopsis & Discussion

Forecaster: –R. Nicoll

There is a trough to the north, currently located over Idaho that is tracking off the east. The trough will cause some breeziness today, but calmer conditions will settle over the region tomorrow. Monday and Tuesday will have some breezy easterly winds early in the day. Wednesday will be a little breezy out of the southwest most of the day. We do anticipate some thunderstorms in the state on Monday and Tuesday as well, but they should stay over far eastern/northern Arizona. Fortunately, winds over the weekend and into next week are not forecast to be strong enough for a significant dust threat. Therefore, we will be keeping the dust risk Low through the forecast period. Check back on Tuesday for the next update. Until then, have a great Memorial Day weekend!
