

December 20, 2012

Eric Massey
ADEQ, Air Quality

Dear Mr. Massey.

Your exceptional event documentation for July 3, 2011 was reviewed at the NRCD meeting today Dec. 20, 2012

Thank you for your work on this report. It does show the exceptional event that happened July 3, 2011. We appreciate that you have made this statement for Yuma County. Unfortunately this is not the only exceptional event that has happened. We had another storm this last summer that took out trees and did more than move PM10.

We look forward to our continued conversation about air quality and the effects of humidity, temperature, and desert soils on air quality. As you know Yuma County and the agricultural community would like to become an attainment area.

Thank you for all of your work collecting data to make these demonstrations.

Yours truly,

Mark Kuechel
Yuma NRCD

Sheryl Christenson
Laguna NRCD
