

**NOTICE OF AVAILABILITY  
KLONDYKE TALINGS PROJECT  
WATER QUALITY ASSURANCE REVOLVING FUND (WQARF) SITE  
FEASIBILITY STUDY (FS) WORK PLAN**

The Arizona Department of Environmental Quality (ADEQ) has completed the feasibility study (FS) work plan to implement the FS for the Klondyke Tailings Project Water Quality Assurance Revolving Fund (WQARF) site in Graham county, Arizona [Arizona Administrative Code R18-16-404(C)(1)(d)]. An FS is conducted to identify a reference remedy and alternative remedies that appear to be capable of achieving established remedial objectives and to evaluate them based on the comparison criteria to select a remedy. The FS is anticipated to begin February, 2015

The Klondyke Tailings Project site is located on the north bank of Aravaipa Creek, approximately 4.5 miles upstream of the Aravaipa Canyon Wilderness Area in Arizona. The site is located approximately two miles north of the town of Klondyke in Section 6, Township 7 South, Range 20 East. The boundaries of this site are irregular and the site boundaries are defined by the extent of the soil contamination above the residential soil remediation level for lead of 400 milligrams per kilogram (mg/kg). The site is comprised of two piles of mine tailings. The soil is between and adjacent to these piles and several surrounding properties. Contaminants of concern at the site are antimony, arsenic, cadmium, copper, lead, manganese, mercury, vanadium and zinc.
