Table J-3 – West Van Buren WQARF Site Facilities Assessed

Facility Name	Facility Address	Summary
27th Avenue Swap Meet Property	310 and 320 S. 27 th Avenue ¹	The facility stored brake fluid, paints, solvents, and pesticides. ² Soil samples were not analyzed for contaminants of concern (COCs).
3010 West Lincoln Venture	3010 West Lincoln Street	
3 D One LLC/Gas Warz 305 Facility	3445 W. Van Buren Street	An underground storage tank (UST) at the facility contained 550 gallons of used motor oil. A small hole was observed in the used oil UST when it was removed; however, there were no signs of hydrocarbon constituents in the soils surrounding the tank and no other structural failures were observed. Two soil samples were taken from an area adjacent to the waste oil tank and analyzed for total petroleum hydrocarbons (TPHs) and purgeable halocarbons. These borings did not detect hydrocarbon constituents in either the native soils adjacent to or beneath the tanks or in the backfill material. Soil samples were not analyzed for COCs.
ADHS State Laboratory	1520 W. Adams Street	The facility generated less than 1,000 kilograms of 1,1,1-trichloroethane (TCA) and trichloroethene (TCE) per month.
ADOA Fleet Management Motorpool	1522 W. Jackson Street	Two soil samples were taken below a 550-gallon waste oil UST that had two “small” holes on top and had the appearance of being overfilled. Sampling results were not provided; however, according to the City of Phoenix Fire Department report, the soil smelled like solvents and petroleum. There also was a confirmed release of waste oil and “parts cleaning solvent” from the 550-gallon UST. The volume of the release was unknown.
ADOT Materials Testing Lab	1745 W. Madison Street	TCE was used at the facility.
ADOT Engineering Building	205 S. 17 th Avenue	Chromium was detected in drywell sediment samples at concentrations lower than the residential soil remediation level.
ADOT Facilities Warehouse/General Operations Building	1651 and 1655 W. Jackson Street	Chromium was detected in a drywell sediment sample at a concentration lower than the residential soil remediation level.
ADOT Sign Factory	2104 S. 22 nd Avenue	Chromium was detected in a drywell sediment sample at a concentration lower than the residential soil remediation level.
ADT Security	114 N. 9 th Avenue	A UST at the facility contained 550 gallons of waste oil. Based on a visual indication of soil staining, a facility site assessment surmised that a release of waste oil was the result of spillage from disposal of the waste oil through the fill pipe of the waste oil UST. However, during defueling of all USTs at the facility, it was determined that the tanks only contained fuel. Two samples were taken based on visual soil staining, but accompanying documentation did not indicate sample types or the type of chemical analysis performed. There was no mention of volatile organic compounds (VOCs) made in any documentation on file.

¹ Anderson Clayton Co. also operated at 320 S. 27th Avenue.

² Brake cleaners may contain PCE and TCE.

Table J-3 – West Van Buren WQARF Site Facilities Assessed

Facility Name	Facility Address	Summary
Air Liquide America LP	301 S. 45 th Avenue	Site investigations identified chromium, petroleum hydrocarbons, and chlorinated hydrocarbons such as TCA, TCE and PCE in soils. PCE, TCE, and TCA detected in groundwater samples collected at the facility.
Air Tuf Products, Inc.	101 N. 45 th Avenue	TCE, TCA, and waste oil were used at the facility. TCE, TCA, and 1,1-dichloroethene (1,1-DCE) were detected in groundwater and TCE and TCA were detected in air at the facility. Soil stains were visible from the drum storage area to the drywell located in the west parking lot at the facility. There was no evidence of soil or soil gas sampling at the facility.
Aloha Cleaners	1825 W. Buckeye Road	Spillage was present in the vicinity of the dry cleaning machines and behind the facility; however, the facility used 140 Solvent and claimed that it never used PCE. The facility is located outside the plume boundary.
American Daylight Co. Inc. (Arizona Daylight Co., Clearview Corporation, Finishline Industries, Interstate Wrecking, Manumann Lift Trucks, Phoenix Metallics, Southwest Center Upholstery, Trans Sierra Rentals, Viking Supply Corporation, and Viking Supply Corporation Plumbing also operated at this address)	2308 S. 11 th Avenue	No information regarding COC use or testing found for this address.
American Garage Door (CC-Pak Plastics and Steel Specialists also operated at this address)	3103 W. Lincoln Street	Chromium was detected in soil at the facility.
American Linen Supply Company	720 W. Buchanan Street	Site investigations identified petroleum hydrocarbons, and chlorinated hydrocarbons such as 1,1,1TCA, TCE and PCE in soils. PCE, TCE, and TCA benzene and methyl chloride were detected in groundwater samples collected at the facility.
American National Can	211 N. 51 st Avenue	Chromium was detected in an on-site drywell below Arizona Health-Based Guidance Levels. TCA, TCE, perchloroethene (PCE), and 1,1-DCE were detected in soil gas at the facility. PCE, 1,1-DCE, TCA, and TCE were detected in soil at the facility above laboratory detection limits.
Anderson Clayton/Western Cotton	615 S. 51 st Avenue	PCE, TCA, and TCE were detected in an on-site industrial well; however, the facility claimed that it did not use any of the contaminants found in groundwater on-site. TCE also was detected in soil at the facility.
Anocad Plating Company	2540 W. Cypress Street (Painting Shop)	Unknown chemicals spilled at the facility, which is located outside of the plume boundary. TCE, TCA, and chromium were used at the facility.

Table J-3 – West Van Buren WQARF Site Facilities Assessed

Facility Name	Facility Address	Summary
	2617 W. Cypress Street (Plating Shop)	The facility received numerous violations for failure to store waste in drums that were in good condition and did not leak. The drum storage area was covered to a “large percentage with spilled/leaked material.” Sampling was conducted at the facility, but solvents historically used at the facility were not detected in samples. The facility is located outside the plume boundary.
	6033 W. Sherman Street	PCE, TCA, and chromium were used at the facility. PCE and TCA were detected in wastewater and PCE was detected in air at the facility. Chromium was detected in a downgradient well. PCE and TCA were released to an unauthorized landfill under the Resource Conservation and Recovery Act. The location of the landfill is unknown.
Ari-Tex Tires	1701-1707 S. 22 nd Avenue	Chromium was detected in soil at the facility. Used oil was disposed on-site.
Arizona Bus Lines	814 W. Jefferson Street	About 100 to 1,000 kilograms of PCE and TCE were used at the facility per month. A UST at the facility stored 500 gallons of used oil. No analyses for COCs were conducted on the used oil leaking underground storage tank (LUST).
Arizona Carburetor Manufacturing	2046 W. Buckeye Road	About 100 to 1,000 kilograms of PCE and TCE were used per month at the facility.
Arizona Industries for the Blind	3013 W. Lincoln Street	The facility generated less than 1,000 kilograms of F002, F003, and F005 waste, which according to the Code of Federal Regulations, may contain a percentage of PCE, TCE, and TCA, among other chemicals.
Arizona Lift Trucks	317 S. 9 th Avenue	Stained soil and evidence of spills and/or overfills were associated with a 250-gallon waste oil UST. In addition, pin-sized holes were found in the UST. A soil sample taken under the waste oil UST was analyzed for petroleum hydrocarbons and chlorinated solvents. No chlorinated solvents were identified in the soils beneath the waste oil UST.
Arizona MPP and Pioneer Metal Finishing	230 S. 49 th Avenue	Chromium was detected in soil and drywell sediment samples below residential soil remediation levels.
Arizona Public Service	408 S. 43 rd Avenue	About 30 gallons of solvent were released onto a concrete floor. PCE, 1,1-DCE, cis-1,2-DCE, and TCE were detected in groundwater at the facility. Chromium was detected in soil obtained from an on-site spray pond.
	505 S. 2 nd Avenue	PCE, TCE, and TCA were detected in soil borings at the facility. Unnamed VOCs were detected in soil vapor samples. PCE, TCE, and 1,1-DCE were detected in two upgradient and two downgradient wells below Arizona Aquifer Water Quality Standards.
Arizona Transmission Service	402 N. 35 th Avenue	The facility used transmission fluid and motor oil.
Arizona Transport Refrigeration, Inc.	830 S. 23 rd Avenue	A UST at the facility contained 500 gallons of waste oil. A release from the waste oil UST was discovered upon removal of the tank; however, no holes were noted in the UST at the time it was removed. Two soil samples were taken from the UST excavation and were analyzed for TPHs and halogenated and aromatic

Table J-3 – West Van Buren WQARF Site Facilities Assessed

Facility Name	Facility Address	Summary
		VOCs. No detectable concentrations of TPHs and halogenated and aromatic VOCs were found above method detection limits.
Arizona Trucking and Storage Services	2310 and 2320 W. Sherman Street	TCA was used at the facility. Corroded drums were found at the facility, but no sampling was conducted. An anonymous complainant reported that when the facility had a leaky container, it would empty the container into a large hole in the back lot of its site. However, during a hazardous waste inspection there was no evidence of disturbed soil or any disposal hole in the back lot of the facility.
Arizona Woodcraft	2200 W. Fillmore Street	
Arnold Corporation	40 S. 45 th Avenue	PCE, 1,1-DCE, and TCE were detected in soil samples obtained from an on-site drywell. PCE, TCA, TCE, and 1,1-DCE were detected in soil gas samples at the facility.
AT&T	505 N. 51 st Avenue	TCA was used at the facility. TCA, TCE, PCE, 1,1-DCE, and 1-1-dichloroethane (1,1-DCA) were detected in soil gas at the facility. TCE, PCE, 1,1-DCA, and chromium were detected in soil at the facility. TCA was detected in the air at the facility.
Auto Safety House	2630 W. Buckeye Road	A confirmed release of waste oil from a UST contaminated about three yards of soil at the facility. PCE and TCA were detected in soil obtained near the waste oil UST.
Best Dry Cleaners	1515 N. 7 th Avenue	A solvent UST existed at the facility, but the owner claimed to only use mineral spirits. The facility is located outside the plume boundary.
Bill's Cylinder Head Shop	1620 S. 27 th Avenue	A "substantial" amount of oil was discharged to the soil in the dirt yard area west of the service building at the facility. Chromium was detected in samples obtained from a dark, oily residue located in the dirt yard.
Brake Supply Company	420 S. 7 th Avenue	PCE and TCE were detected in soil and soil gas at the facility.
Bud's Oil	1340 W. Lincoln Street	TCA was used at the facility. Chromium, PCE, TCA, and TCE were detected in soil and TCE, PCE, and 1,1-DCE were detected in groundwater at the facility.
Maaco/ Burmeno Enterprises doing business as Maaco (Complete Paint and Body also operated at this address)	2323 W. Van Buren Street	Chromium was detected in "soil/sludge" and "dry filter material, dust" samples at the facility. There were reports of paint waste and solvent disposal in the back of the facility.
CAD Enterprises Incorporated	302 N. 52 nd Avenue	TCE, TCA, and Lube Rite Solvent were used at the facility. Chromium was detected in soil obtained from an on-site drywell at concentrations below the soil remediation level, but above the minimum groundwater protection level.
Capitol Collision Repair	902 S. 19 th Avenue	The facility used less than 1,000 kilograms of F005 waste per month, which according to the Code of Federal Regulations, may contain PCE, TCE, and TCA, among other chemicals.

Table J-3 – West Van Buren WQARF Site Facilities Assessed

Facility Name	Facility Address	Summary
Charles W. Carter Company, Inc.	1717 W. Roosevelt Street	The facility used an unknown quantity of F002 waste, which according to the Code of Federal Regulations, may contain PCE, TCE, and TCA, among other chemicals.
Checker Auto Parts Store No. 1160	3409 W. Van Buren Street	Soil staining was found near the facility. There was no evidence of soil or soil gas sampling at the facility.
Chemical Waste Management	2301 W. Broadway Road	TCA and chromium were used at the facility, which is located outside of the plume boundary. About 92 pounds of chlorinated solvents containing TCA and methylene chloride were spilled at the facility. In addition, there was a spill of five pounds of chromium hydroxide at the facility.
ChemResearch Company	1101, 1122, and 1130 W. Hilton Avenue 1120 W. Watkins Street	Facility has had known releases of COCs. Site investigations identified PCE and Chromium in soils. Chromium and PCE were detected in groundwater samples collected.
Christy Signs	1524, 1825, 1892 S. Black Canyon Highway	Barrels of paint and paint-related waste were leaking onto soil at the 1524 S. Black Canyon Highway facility in an area rented by Eller Outdoor from Christy Signs. Stained soil was observed around the drums. Chromium was not detected in used paint filters at the facility. PCE was detected in groundwater at the facility.
Chromalloy Arizona	5161 W. Polk Street	PCE, TCE, and chromium were used at the facility. Chromium was detected in soil, drywell, wastewater, air, clarifier sludge, "bulk" floor sweep, arc spray filter, and "wet clay" samples at the facility.
Cobb International, Inc.	300 S. 25 th Avenue	About 100 to 1,000 kilograms of PCE waste was generated at the facility per month.
Consolidated Freightways	830 S. 25 th Avenue	Documented releases of hydrogen chloride and "trifluoroacetic acid" exist for the facility.
Consolidated Rebar, Inc. (Olson Erectors, Inc. doing business as Viking Steel	321 S. 27 th Avenue	The facility used "Miscellaneous Metals, Possible Solvents."
Continental Equipment	2910 W. Durango Street	A "small amount of staining" was found at the facility. The facility, which is located outside the plume boundary, used 55 gallons of solvents per year.
Cool Air (Buckeye Road Cleaners also operated at this address)	2901 W. Buckeye Road	TCE, TCA, and carburetor cleaner, which may contain PCE and TCE, were used at the facility. A six-inch conduit to the septic tank was readily available for dumping of waste and that area was messy and had oily floors.
Dolphin, Inc	740 S. 59 th Avenue	Site investigations identified chlorinated hydrocarbons such as 1,1,1-TCA, 1,1-DCA cis-1,2-DCE, 1,1-DCE, TCE and PCE in soils. 1,1,1-TCA, 1,1-DCA cis-1,2-DCE, 1,1-DCE PCE and TCE were detected in groundwater samples collected at the facility.
Felton King Company	611 S. 15 th Avenue	No relevant information was found for this facility.
Fleet Painting and Body Shop, Inc.	3432 W. Sherman Street	The facility generated F001, F003, and F005 waste, which according to the Code

Table J-3 – West Van Buren WQARF Site Facilities Assessed

Facility Name	Facility Address	Summary
		of Federal Regulations, may contain PCE, TCE, and TCA, among other chemicals. An inspection was performed at the facility in response to a complaint that the body shop was dumping chemicals on the ground around the shop and burying material on-site.
Fleming Foods (Associated Grocer's also operated at this address)	624 S. 25 th Avenue	PCE, 1,1-DCA, 1,1-DCE, TCA, TCE, and cis-1,2-DCE were detected in groundwater at the facility. Safety Kleen parts cleaning solvent was used at the facility.
Fortune Plastics, Inc.	3401 W. Buckeye Road	PCE and TCA were used and released into the air at the facility.
Grand Avenue Garage	1015 Grand Avenue	The facility used Pioneer 360 solvent and carburetor cleaner, which may contain PCE and TCE. The facility also disposed of waste oil and solvents on-site.
Grille Corporation (Cypress Environmental, Inc. also operated at this address)	2452 W. Sherman Street	TCA was used at the facility.
Hi-Tech Plating & Shielding, Inc.	4313 W. Van Buren Street	PCE, TCE, and chromium were use at the facility. PCE and TCE were detected in an on-site drywell and chromium was detected in wastewater at the facility.
Holiday Cleaners	2909 W. Van Buren Street	Facility generated F002 waste, which according to the Code of Federal Regulations, may contain PCE, TCE, and TCA, among other chemicals.
Holsum Bakery	408 S. 23 rd Avenue	PCE, TCE, TCA, 1,1-DCE, cis-1,2-DCE, and 1,1-DCA were detected in groundwater and PCE was detected in soil at the facility.
Ingersoll Rand Building	820 N. 17 th Avenue	PCE was used at the facility. Chromium was detected in sludge generated at the facility.
International Window	2121 S. 15 th Avenue	Chromium, 1,1-DCA, PCE, and TCE were detected in groundwater and PCE was detected in soil at the facility.
Interstate Wreck Rebuilder, Inc.	3215 W. Lincoln Street	The facility generated an unknown quantity of F003 and F005, which according to the Code of Federal Regulations, may contain PCE, TCE, and TCA, among other chemicals.
Jaquay's Equipment Company	1219 S. 19 th Avenue	Empty drums of PCE were found at the facility, but the facility owner indicated that PCE was not used at the facility. PCE and TCE were detected in groundwater at the facility. Staining was observed at the facility, but no soil sampling information was located.
Joe's Diesel Repair	6316 W. Van Buren Street	TCA and TCE were detected in soil at the facility.
Joplin RV Sales, Inc.	2301 W. Buckeye Road	Chromium was detected in soil at the facility.
JT's Diesel Repair	717 N. 21 st Avenue	PCE and TCE were detected in groundwater and PCE was detected in a soil boring in the vicinity of a diesel UST at the facility.
K & L Quartztek	20 S. 48 th Avenue	PCE, TCA and chromium were used at the facility. No staining was found at the facility.

Table J-3 – West Van Buren WQARF Site Facilities Assessed

Facility Name	Facility Address	Summary
La Duc's Auto Supply	3045 W. Buckeye Road	Chromium was detected in the liquid waste stream generated from a hot caustic dip tank at the facility. Analysis of a stained soil area at the facility indicated that the facility's hazardous waste management practices resulted in a release of hazardous waste to the environment. No information was found regarding what substances were found in soil at the facility.
La Patisserie Bakery	1317 W. McKinley Street	Chromium was detected in soil at the facility.
LaSalle Draperies	710 W. Buchanan Street	PCE and TCE were detected in soil gas and groundwater at the facility.
M & D Electrical Parts Remanufacturing, Inc.	2821 W. Van Buren Street	Chromium was detected in soil obtained from an on-site drywell.
Manco Incorporated	1738 W. Lincoln Street	About five to ten gallons of machine oils and cleaning solvent may have been disposed of in the dirt parking lot behind the facility when the UST was full. Several spill areas were identified during the inspection including the following: ground in the east yard; oil/solvent-soaked ground in the east yard; oil/solvent-soaked ground about 10 feet south of the southeast corner of a metal shed in the east yard; and oil/solvent-soaked ground about 10 feet south of a telephone pole located on the north end of the east yard. Chromium was not detected in soil samples collected from the east yard and the samples were not analyzed for VOCs. ADEQ inspectors observed a release of used oil to the environment in the northeast area of the property. Chromium was detected in an oil sample.
Maricopa County Materials Management	320 W. Lincoln Street	Site investigations identified TCE and PCE in soils. PCE and TCE were detected in groundwater samples collected at the facility.
Maricopa Tractor Trailer	331 N. 7 th Avenue	PCE, TCA, TCE, and cis-1,2-DCE were detected in soil gas at the facility.
Martin Van Buren Commerce Park – Phase I	301, 401, 402 N. 37 th Drive and 3740 W. Van Buren Street	Chromium was detected in sediment samples obtained from an on-site drywell.
Maximet Corporation	5925 W. Monroe Street	TCA was used and released into the air at the facility. Chromium was detected in an on-site drywell. TCE and TCA were detected in soil at the facility. Plating area tables and the floor beneath showed evidence of chrome solution contamination.
Milum Textile Service	333 N. 7 th Avenue	PCE was used at the facility. PCE, TCA, and TCE were detected in soil gas and PCE, TCE, and 1,1-DCE were detected in groundwater downgradient of the facility.
National Metals Co.	301 S. 19 th Avenue	Chromium was detected in soil sludge at the facility.
	320 S. 19 th Avenue	TCA was used at the facility. Chromium was detected in soil gas at the facility.
	443 E. Buckeye Road	The facility is located about 2,000 feet upgradient from a well that contained TCE and is located outside the plume boundary.
Optifab, Inc.	1550 and 1554 W. Van Buren Street	TCA was used and detected in groundwater at the facility. No VOCs were detected in soil samples at the facility.

Table J-3 – West Van Buren WQARF Site Facilities Assessed

Facility Name	Facility Address	Summary
Orbit Cleaners	1002 N. 35 th Avenue	Minor staining was found behind the facility. The property owner indicated that the facility used petroleum naphtha and had never used PCE. The facility is located outside the 2004 plume boundary, but was located within the 2003 plume boundary.
Petco	304 S. 67 th Avenue	TCA and TCE were detected in soil at the facility. PCE was detected at low concentrations in sludge generated at the facility.
Philip Services Corp./Philips Transportation and Remediation	1801 W. Watkins Street	A complaint was recorded regarding leaking drums without labels at the facility. Soil staining was suspected to be copper sulfate spillage. Spills from two waste streams, including one that contained chromium, were observed at the facility. However, soil samples obtained from the spill area did not contain metals.
Phoenix Heat Treating, Inc.	2405 W. Mohave Street	TCA was used and released to the air at the facility. Conflicting information exists regarding whether the facility used TCE. TCA was detected in soil and TCA, TCE, and 1,1-DCE were detected in soil gas at the facility. Chromium was detected at non-hazardous levels in a 400-gallon sludge spill at the facility.
Phoenix Metal Trading, Inc.	610 S. 19 th Avenue	The facility generated greater than 1,000 kilograms of F002 waste per month, which according to the Code of Federal Regulations, may contain PCE, TCE, and TCA, among other chemicals.
Phoenix Police Building Parking Lot	706 W. Washington Street	Chromium was detected in soil and soil vapor at the facility.
Precision Industrial Painting	1139 W. Hilton Avenue	TCA was used at the facility. Paint waste may have been disposed of on-site. Spills of a crystallized form of “cake” were found around the water treatment area. A concrete pad had a brown-powdered material, yellow paint particles, and stagnate water. Chromium was detected in the wastewater system.
ProClean Incorporated	4315 W. Van Buren Street	The facility “used or stored” industrial detergents and cleaning compounds for food service facilities. It is unknown if the substances listed contained the COCs. The City of Phoenix observed “unknown hazardous/corrosive materials” leaking from the rear loading dock and contaminating an on-site drywell.
Proctor and Gamble	2050 S. 35 th Avenue	A small spill of 1-1-DCE and carbon tetrachloride occurred at the facility.
Prudential Overall Supply	5102 W. Roosevelt Street	Site investigations identified PCE in soils.
Ray & Bob’s Truck Salvage	101 S. 35 th Avenue	TCA and TCE were detected in soil at the facility.
RB Machine Co., Inc.	3729 W. Buchanan Street	Chromium was used and detected in soil at the facility.
Research Chemicals	8220 W. Harrison Street	PCE, TCA, TCE, and 1,1-DCE were detected in soil and groundwater at the facility.
Reynolds Metals Company	35 th to 43 rd Ave and W. Van Buren Street and Union Pacific Railroad	Site investigations identified chromium, petroleum hydrocarbons, and chlorinated hydrocarbons such as TCA, TCE, 1,1-DCE and PCE in soils. TCA and 1,1-DCE were detected in groundwater samples collected at the facility.

Table J-3 – West Van Buren WQARF Site Facilities Assessed

Facility Name	Facility Address	Summary
Rio Salado Community College (Childress Buick also operated at this address)	621 N. 7 th Avenue	The facility had a 300-gallon waste oil LUST. Photoionization (PID) detector results indicated that low to below detection limit concentrations of VOCs were present at the site; however, PID measurements taken during the removal of the tank indicated significant levels of VOCs. The types of VOCs detected at significant levels are unknown.
Rinchem Company	1550 W. Lower Buckeye Road	PCE, TCE, and TCA were used at the facility, which is located outside the plume boundary. PCE, TCA, and TCE were detected in soil at the facility.
	2115 S. 15 th Avenue	PCE, TCE, 1,1-DCE, and 1,1-DCA were detected in groundwater at the facility.
	4115 W. Turney Avenue	PCE, TCE, and TCA were sold in bulk by the facility. PCE and TCE were detected in soil gas and TCA, 1,1-DCE, and 1,1-DCA were detected in soil at the facility, which is located outside the plume boundary.
Roadway Express	2021 S. 51 st Avenue	TCE was detected in soil at the facility.
Russell Family Trust	250 N. 7 th Avenue	Chromium was detected in soil at the facility.
Ryder Facility LC-1637	5502 W. Latham Avenue	Chromium was detected in soil at the facility.
Sahuaro (Saguaro) Petroleum & Asphalt	731 N. 19 th Avenue	The facility used hydrochloric acid in the processing of asphalt emulsion and sale of medium cure asphalt. In addition, 2,000 cubic yards of diesel-contaminated soil was excavated and mixed with asphaltic material for use on roadways at the facility. Kleinfelder, Inc. did not sample the property for the Phase I Report for the West Van Buren Area because the company was “defunct” and Kleinfelder, Inc. was unable to gain access to the property.
	1935 W. McDowell Road	PCE was detected in groundwater at the facility, which is located outside the plume boundary. Kleinfelder, Inc. did not sample the property for the Phase I Report for the West Van Buren Area because the property was “asphalt covered.”
Salesco Systems USA (Onyx Environmental Services, LLC and Superior Special Services also operated at this address)	5736 and 5752 W. Jefferson Street	PCE, TCE and chromium were used at the facility. PCE, 1,1-DCE, 1,1-DCA, and chromium were detected in an on-site drywell. Chromium was detected in wastewater at the facility.
Salt River Project 55 th Avenue Fuel Storage Facility	100 and 120 S. 55 th Avenue	PCE, TCE, TCA, 1,1-DCA, and 1,1-DCE were detected in groundwater at the facility.
	1616 E. Lincoln Street	PCE, TCE, and TCA were used at the facility, which is located outside the plume boundary.
San Joaquin Refining Co.	131 S. 57 th Avenue	TCE was used and detected in groundwater at the facility.
Santa Fe Railroad	707 N. 20 th Avenue	TCE and TCA were detected in soil and TCE, PCE, and cis-1,2-DCE were detected in groundwater at the facility.

Table J-3 – West Van Buren WQARF Site Facilities Assessed

Facility Name	Facility Address	Summary
Sav-Trac of Arizona, Inc. (Durango Industrial, Inc. also operated at this address)	2602 W. Durango Street	About 300 gallons of Rinsolve 140 cleaning solvent were used at the facility per year. Rinsolve 140 cleaning solvent generated F003 waste, which according to the Code of Federal Regulations, may contain PCE, TCE, and TCA, among other chemicals. The facility also used Independent Oil Co. solvent, Zep 940E, and Zep “Steam and Clean.” During an inspection, spent-solvent waste from the steam-cleaning operations was observed flowing into an on-site ditch, which drained into an on-site drywell that had a dark, oily residue. Drywell fluid and sediment was tested and showed metals and VOCs below the state-established recommended contaminant levels.
Schuff Steel	420 S. 19 th Avenue	PCE, TCE and chromium were detected in sludge, and chromium was detected in liquid at the facility. Stained earth was observed at the facility as well as oil, baghouse dust, and paint spills.
Seaport Refinery (also known as Seaport Petroleum Caljet)	25 N. 57 th Avenue	The facility reported that it did not use solvents and that any soil staining was the product of leaking oil and petroleum. COCs were not tested for on-site.
SmithKline Beechman Co. (formerly Beckman Instruments, Inc.)	5340 W. Buckeye Road	No relevant information was found for this facility.
Soberg Industries	1119 W. Hilton Avenue	PCE, 1,1-DCE, and TCA were detected in soil gas at the facility.
Southwest Gas (Markhon Industries also operated at this address)	9 S. 43 rd Avenue	The facility was one of 16 facilities that were suspected of contributing to groundwater contamination in Maryvale; however, the facility claimed it did not use TCE or TCA. No sampling information was found for the facility.
Stanco Petroleum Equipment, Inc.	4625 W. Van Buren Street	Chromium was detected in soil at the facility. The facility used a solvent, but the chemical composition is unknown.
Sta-Rite Industries, Inc.	1146 W. Hilton Avenue	Oil-stained soil was observed in a vacant lot west of the facility. PCE was detected in soil at the facility.
SubZero Freezer Co.	3865 W. Van Buren Street	PCE, TCA, and chromium were used at the facility. Chromium and TCA were detected in the air at the facility.
Texaco Service Station No. 3	3438 W. Buckeye Road	A UST at the facility contained 550 gallons of used motor oil. Soil samples were taken from UST excavation pits and were tested for TPH and BTEX only. Samples were not analyzed for COCs.
The Washhouse LRS (Westside Laundromat also operated at this address)	3114 W. Van Buren Street	PCE was used at the facility. There was a spill of 10 gallons of PCE inside a building at the facility.
Thermo Fluids, Inc.	4301 W. Jefferson Street	The facility generated unknown quantities of F003 and F005 waste, which according to the Code of Federal Regulations, may contain PCE, TCE, and TCA, among other chemicals. The facility also accepted used oil with TCE from Honeywell. Chromium, TCE, 1,1-DCE, PCE, and TCA were detected in filter residuals and PCE was detected in baker tanks at the facility.

Table J-3 – West Van Buren WQARF Site Facilities Assessed

Facility Name	Facility Address	Summary
Thunder Trading	711 N. 17 th Avenue	The facility generated an unknown quantity of PCE waste. The LUST did not contain information about COCs.
Times Fiber Communications	2920 E. Elwood Street	No relevant information was found for this facility, which is located outside the plume boundary.
	4648 W. Van Buren Street	TCA was used and detected in groundwater at the facility.
Transcon Lines	3839 W. Buckeye Road	PCE and TCE were detected in soil at the facility. PCE, TCE, 1,1-DCA, and 1,1-DCE were detected in groundwater at the facility.
Treffers Precision	1021 N. 22 nd Avenue	PCE, TCA, and chromium were used at the facility. Chromium and PCE were detected in shallow soil samples and PCE was detected in air at the facility.
Tritech Manufacturing (Tri-Star Quality Metal Finishing, and Sav-On Plating, Inc. of Arizona also operated at this address)	5144 W. McKinley Street	TCE, TCA, and chromium were used at the facility. PCE was detected in soil obtained from an unknown location at the facility. Chromium was detected in soil obtained from an on-site drywell. PCE and TCE were detected in groundwater obtained from a soil boring near an on-site drywell. Wastewater from electroplating operations flowed into an on-site drywell. Wastewater containing chromium leaked into an asphalt pavement. In addition, 140 gallons of chromic acid and cyanide solution as well as 500 to 900 gallons of acid with dissolved metals were released at the facility.
Truck Salvage Company	1409 and 1433 S. 19 th Avenue	PCE and TCE were detected in monitoring wells south of the facility, which is located outside of the plume boundary. The facility may have septic tank contamination, but no additional information was found regarding the possible contamination. The facility possibly used HVOC-based solvent in the past.
Truck Works, Inc.	3216 W. Sherman Street	The facility generated 100 to 1,000 kilograms per month of PCE, TCE, and F003 and F005 waste, which according to the Code of Federal Regulations, may contain PCE, TCE, and TCA, among other chemicals.
Tune-up Masters	1501 W. Van Buren Street	The facility generated an unknown quantity of F002, F004, and F005 waste, which according to the Code of Federal Regulations, may contain PCE, TCE, and TCA, among other chemicals.
U.S. Department of Energy – Western Area Power Administration	615 S. 43 rd Avenue	Site investigations identified TCA and PCE in soils. 1,1-DCE PCE and TCE were detected in groundwater samples collected at the facility.
V.A.W. of America	249 S. 51 st Avenue	Chromium was detected in wastewater and two dross piles at the facility.
Valdez Transfer	421 S. 33 rd Avenue	The facility generated less than 100 kilograms per month of PCE waste.
Valley American Corporation (Valley Agro-Chem and Valley Feed and Seed also operated at this address)	1918 W. Van Buren Street	Pesticides spills were reported at the facility. Pesticide containers found on-site appeared to be old, unmarked, and may have contained PCE and TCE, but soil samples were not analyzed for COCs.
Van Buren Industrial Properties	34-74 N. 45 th Avenue	Chromium was detected in an on-site drywell.

Table J-3 – West Van Buren WQARF Site Facilities Assessed

Facility Name	Facility Address	Summary
Van Buren Tank Farm (VBTF)	Southwest corner of 51 st Avenue and Van Buren Street	PCE, TCE, TCA, 1,1-DCE, 1,1-DCA, and cis-1,2-DCE were detected in groundwater at the VBTF. The following information pertains to facilities located within the VBTF: ARCO generated chromium waste; BP West Coast Products, LLC generated TCE and chromium waste; Caljet generated F003 and F005 waste, which according to the Code of Federal Regulations may contain PCE, TCE, and TCA, among other chemicals; Chevron used an automotive parts cleaning solvent, but the constituents of the solvent are unknown; chromium was detected in fuel filters generated by Chevron; Chevron also generated F003 and F005 waste, which according to the Code of Federal Regulations may contain PCE, TCE, and TCA, among other chemicals, and no COCs were detected in soil samples obtained from the Chevron facility; TCE was detected in soil at the Southern Pacific Pipelines facility; TCE, PCE, and TCA were detected in soil at the UNOCAL facility; and PCE, TCE, TCA, 1,1-DCE, 1,1-DCA, and cis-1,2-DCE were detected in the evaporation pond and process water at the UNOCAL facility.
Van Waters and Rogers Inc.	50 S. 45 th Avenue	Site investigations identified chlorinated hydrocarbons such as TCA, 1,1-DCA, 1,2-DCA, 1,1-DCE, TCE and PCE in soils. TCA, 1,1-DCA, 1,2-DCA, 1,1-DCE, TCE and PCE were detected in groundwater samples collected at the facility.
VEM	715 N Black Canyon Highway	
World Resources	8113 W. Sherman Street	PCE and chromium were used at the facility. Chromium was detected in air, TCE, TCA, and chromium were detected in soil, and TCA and chromium were detected in groundwater at the facility.
Yellow Freight Systems	3425 S. 43 rd Avenue	The facility had a release of an unknown substance. Substances stored on-site included 160,000 gallons of diesel fuel in a UST, 10,000 gallons of motor oil in a UST, 6,000 gallons of waste oil in a UST, and 30 gallons of petroleum naphtha solvent. The facility is located outside the plume boundary.
