

Long Term 2 Enhanced Surface Water Treatment Rule

Intent to Provide Maximum Treatment Notice

A public water system (PWS) that chooses to provide the maximum level of treatment for *Cryptosporidium* applicable to their plant type (rather than start source water monitoring), must submit written notification no later than the date the PWS is otherwise required to submit a sampling schedule for monitoring. Alternatively, a PWS may choose to stop sampling at any point after the system has initiated monitoring if the system provides written notification that the system will provide this level of treatment. Submitting this form satisfies the requirement to submit a notice of intent to provide maximum treatment. A PWS must also install and operate technologies to provide this level of treatment by the applicable treatment compliance date.

Long Term 2 Enhanced Surface Water Treatment Rule
Notice of Intent to Provide Maximum Treatment

PWS Name:		PWS ID:
PWS Address:		
City:	State:	ZIP:
E-mail Address:		
Water Treatment Plant Name:		
Water System Facility ID:		
Type of system that will be providing maximum treatment instead of conducting monitoring: <input type="checkbox"/> Filtered system providing a total of at least 5.5-log of treatment for <i>Cryptosporidium</i> [40 CFR part 141.701(d)(1)]. <input type="checkbox"/> Unfiltered system providing a total of at least 3-log <i>Cryptosporidium</i> inactivation [40 CFR part 141.701(d)(2)].		
Planned date of treatment compliance:		
Planned treatment to achieve compliance:		
<input type="checkbox"/> Yes <input type="checkbox"/> No	I understand the treatment requirements that my PWS is required to meet and am aware of the deadline for providing the treatment.	
<input type="checkbox"/> Yes <input type="checkbox"/> No	I have discussed these requirements with ADEQ
