

ERG Workshop Training

ADEQ is offering FREE training at the following dates and locations. Offered are two programs: “Program A” and “Program B” which cover various topics. Earn your PDHs while you improve your skill in the topics offered. **Classes Start AT 8:00 AM and End AT 5:00 PM.**

Space is limited so please pre-register ASAP!

Register online at: www.OPSCERT-ERG.com

For registration questions, please contact April Adams, Instant Event Solutions, at april@corpdest.com or phone (602-482-1788) fax (602-482-2113).

Special hotel room rates are available; however you must reserve rooms in advance and request the rate.

Program A

Oct 23 & 24, 2007	Nov 15& 16, 2007	Mar 13 & 14, 2008	May 15 & 16, 2008
Prescott Resort 1500 Highway 69 Prescott, AZ 86301 (928) 776-1666 www.prescottresort.com	Best Western Inn Suites 1450 South Castle Dome Avenue Yuma, AZ 85365 (928) 783-1349 or (928) 783-8341	Radisson Woodlands Hotel 1175 North Route 66 Flagstaff, AZ 86001 (928) 774-0609 www.Radissonflagstaff.com	Hon-Dah Casino and Conference Center 777 Highway 260 Pinetop, AZ 85935 (800) 929.8744 www.hon-dah.com

Safety Training: Confined Space and Trench & Excavation

Operations: Applied Math, System Compliance, Show Me the Money and Certification Review

Workshop details below or at: www.OPSCERT-ERG.com or – www.AWPCA.org

Program B

Jan 24 & 25, 2008	Feb 26 & 27, 2008	Apr 24 & 25, 2008	June 9 & 10, 2008
Holiday Inn Palo Verde 4550 South Palo Verde Blvd Tucson, AZ 85714 (520) 746-1161 www.holidayinnpaloverde.com	Hampton Inn 1791 Sycamore Avenue Kingman, AZ 86409 (928) 692-0200	La Posada 303 East 2 nd Street (Route 66) Winslow, AZ 86047 (928) 289-4366/ (928) 289-3873 www.laposada.org	Cliff Castle Casino 333 Middle Verde Rd Camp Verde, AZ 86322 (800) 381-7566, (928) 567-2642 www.cliffcastlecasino.com

Safety Training: CPR and HAZCOM

Operations: Water Drop Chemistry, Distribution Quantity and Quality, Certification Review and Consumer Confidence Report

Workshop details below or at: www.OPSCERT-ERG.com - or – www.AWPCA.org

Program A

Safety Training: Confined Space, Trench & Excavation

Confined Space Training 200 minutes

This course is a compliance overview for permit-required confined spaces. Topics include confined space hazards, testing and controls, entry permits and OSHA requirements for entry into a permit-required confined space. Roles and responsibilities of the Authorized Entrant, Attendant and Entry Supervisor are discussed and evaluated based on site-specific needs.

Trench & Excavation Training 200 minutes

This course covers OSHA's Excavation standard through the eyes of the competent person. Participants will be taught field applications to minimize the risks of employee injuries, accidents and equipment failures on the worksite. "Competent person" means one who is capable of identifying existing and predictable hazards in the surroundings or working conditions which are unsanitary, hazardous or dangerous to employees, and who has authorization to take prompt corrective measures to eliminate them. Other topics include information on what to do before trenching or excavation, competent person roles and responsibilities, soil classification, site inspections, weather considerations, protective support systems, sloping and benching and emergency response for cave-ins.

Operations: Applied Math, System Compliance, Show Me the Money and Certification Review

Applied Math for Operators 200 minutes

This course is designed as a math refresher for operators in preparation for taking a certification exam and/or to improve on-the-job math skills. Lack of adequate math skills may be a reason an operator fails to pass the certification exam or not operating water facilities within standard operating practices. Math techniques, formulas and practice problems are provided to instruct and build math confidence in students that are in attendance. The practice problems are taken from the AWWA manual and represent real operational situations. (For example: volume, detention, dosage and pumping calculations.)

Is Your Water System in Compliance? 50 minutes

The SDWA Rule Wizard enables a system to determine federal (and State) monitoring requirements for your community water system. The class will review the Rule Wizard as a resource, sample collection, chain of custody and system record keeping requirements to maintain system compliance.

Show Me the Money! 50 minutes

Every water system must have sufficient financial resources to maintain operations and maintenance - as well as preparing for emergencies. The ability to obtain funding requires a budget for day to day operation as well as scheduled emergency maintenance. This class will show you budgeted basics and asset management techniques.

Certification Exam: Need-to-Know 50 minutes

This course will review the material and resources to study in order to prepare for certification exams. Math formulas will be reviewed. Resources will be highlighted and test taking techniques will be reviewed.

Program B

Safety Training: CPR, HAZCOM

CPR/Standard First Aid Certification

200 minutes

The hands-on CPR and First Aid training course prepares employees in the proper administration of first aid until more advanced help can be obtained. Students will apply their knowledge and skills in first aid response by observing and reacting to simulated real-life emergencies

HAZCOM

200 minutes

Violations of OSHA's Hazard Communication standard are consistently one of the top ten citations delivered by OSHA compliance officers. HAZCOM is the communication of chemical hazards found within the workplace to employees, contractors, vendors and visitors alike. In this workshop we will address the regulatory requirements and put a written HAZCOM program together step by step that can be taken back to your organization and implemented immediately. If you have a current HAZCOM program or part of one please bring it to the workshop and we will review and ensure that it is current and accurate.

Operations: Water Drop Chemistry, Distribution Quality and Quantity and Certification Review

Water Drop Chemistry

100 minutes

Water Drop Chemistry topics include alkalinity, pH, disinfection, coagulation, iron and hardness. This course is applicable to the operator in the everyday workplace and will relate to previous experience. A better understanding of water chemistry will improve operator performance.

Distribution Quality and Quantity

100 minutes

Water customers expect adequate water quality as well as quantity of water. Operational techniques and improved standard operating procedures will improve the quality and quantity of water delivered. There are tools available to assist the operator in assessing the water distribution system.

Certification Exam: Need-to-Know

50 minutes

This course will review the material and resources to study in order to prepare for certification exams. Math formulas will be reviewed. Resources will be highlighted and test taking techniques will be reviewed.

Consumer Confidence: One-Stop-Shop

100 minutes

Community Water Systems are required to prepare and distribute Consumer Confidence Reports (CCR). This course will provide drinking water system owners and operators resources including templates and timelines to accomplish this EPA requirement.
