Subject: Bowie Power Station - Revised Modeling Protocol
Attachments: 51133 Bowie - 071013 Protocol.pdf

All,

Attached for your review and comment is the revised modeling protocol for the proposed Bowie Power Station, to be located near Bowie in Cochise County, AZ. The revised protocol provides updates and changes for preparation of a new impact analysis to replace the analysis that was submitted with the application in October 2010. The revised protocol addresses Bowie's selection of different turbine equipment as well as recent changes to rules and standards.

Please let me know if there are other or alternate contacts that should receive this protocol.

Regards,

Wayne D. Bixler
