

FLEET EQUIPMENT CHECK LIST

A fleet station permit applicant or fleet station permit holder, or its employees, shall own or lease the following equipment for testing and repair of a fleet vehicle, and maintain the equipment in good working condition:

1. If the permit is for the inspection of a vehicle required to take an idle only, or an idle plus 2500 rpm unloaded test: (Licensed Dealers Only)

- An NDIR CO and HC emissions analyzer that complies with the requirements of R18-2-1006(F)(8) to conduct the emissions inspection;
- Pressure test equipment for the functional gas cap test that complies with the requirements of R18-2-1006(E)(7); and
- An ignition-operated tachometer.

2. If the permit is for the inspection of a vehicle required to take a steady-state loaded test:

- An NDIR CO and HC emissions analyzer that complies with the requirements of R18-2-1006(F)(8) to conduct the emissions inspection;
- Pressure test equipment for the functional gas cap test that complies with the requirements of R18-2-1006(E)(7); and
- A dynamometer to operate the vehicle under load and
- An ignition-operated tachometer

3. If the permit is for the inspection of a vehicle required to take a transient loaded test:

- Equipment to perform a transient loaded emissions test as required in R18-2-1006(E)(2);
- Equipment to perform the evaporative system pressure test as required in R18-2-1006(E)(2)(b);
- Equipment to perform the maintenance and quality control requirements of R18-2-1006(E)(2) and "IM240 and Evap Technical Guidance;" and
- Pressure test equipment for the functional gas cap test that complies with the requirements of R18-2-1006(E)(7).

4. If the permit is for the inspection of a vehicle required to take an OBD test:

- An OBD II scan tool used to perform the OBD test that complies with the Society of Automotive Engineers Recommended Practice J1979, September 1997, incorporated by reference and no future editions or amendments. A copy of this referenced material is on file with the Department and the Secretary of State and may be obtained at the Society of Automotive Engineers, 400 Commonwealth Dr., Warrendale, PA 15096-0001. The revised reference document, April, 2002, may be electronically obtained by searching the website, <http://www.sae.org/servlets/index>; and
- Pressure test equipment for the functional gas cap test that complies with the requirements of R18-2-1006(E)(7).

5. If the permit is for the inspection of a vehicle required to take a diesel test:

- Opacity meter: A meter used in area A shall comply with the requirements of R18-2-1006(H) for the applicable test procedure. A meter used in area B shall comply with the requirements of R18-2-1006(I)(6)(b); and
- A dynamometer for testing any light-duty diesel vehicle in area A or for testing any diesel vehicle in area
