WEST VAN BUREN
WATER QUALITY ASSURANCE REVOLVING FUND (WQARF) SITE
FEASIBILITY STUDY (FS)**

The Arizona Department of Environmental Quality (ADEQ) has received from the Roosevelt Irrigation District a feasibility study (FS) report for the West Van Buren Water Quality Assurance Revolving Fund (WQARF) site in Phoenix, Arizona. An FS is conducted to identify a reference remedy and alternative remedies that appear to be capable of achieving established remedial objectives and to evaluate them based on the comparison criteria to select a remedy.

The West Van Buren WQARF site consists of a plume located in Phoenix. The plume is bounded approximately by West McDowell Road to the north, West Lower Buckeye Road to the south, 7th Avenue to the east, and 75th Avenue to the west. In addition, a separate, finger shaped plume exists from approximately West Buckeye Road and South 41st Avenue to West Watkins Street and South 11th Avenue and is also associated with the regional contaminant plume. Contaminants of concern at the site are tetrachloroethene (PCE), trichloroethene (TCE), 1,1,1-trichloroethane (1,1,1-TCA), 1,1-dichloroethane (1,1-DCA), *cis*-1,2-dichloroethene (*cis*-1,2-DCE), 1,1-dichloroethene (1,1-DCE), and chromium.

The FS report is available online at:
