## **ADEQ Director Owens Dedicates New Vehicle Emission Inspection Station in Goodyear**

PHOENIX (Dec. 19, 2008) - Arizona Department of Environmental Quality (ADEQ) Director Steve Owens on Friday dedicated the Valley's latest vehicle inspection (VEI) station, located at 16140 W. Eddie Albert Way in Goodyear.

At a ribbon-cutting ceremony this morning, Director Owens said the station officially will be open for business to motorists on Jan. 2. The three-lane station, which is expected to handle about 80,000 inspections annually, will serve the rapidly growing Southwest Valley when the department's new contract with Gordon-Darby, Inc. goes into effect on Jan. 1.

"This new station will make it easier for people who live and work in Goodyear and other parts of the Southwest Valley to get their vehicles inspected," Director Owens said. "This station will help protect the Valley's air quality, while making the inspections more convenient."

Each inspection lane at the new station will have the capability to perform all types of emissions inspections, including two on-board diagnostic (OBD) inspections simultaneously on each inspection lane. The station will be able to quickly and efficiently inspect both conventional- and OBD-equipped vehicles.

Owens said that ADEQ included a requirement that an additional VEI station be built in the Southwest Valley when the VEI contract was sent out for bids last year.

"This is one of the fastest growing parts of the Valley, and we are committed to giving the people of this area the service they need and deserve," Director Owens added. "They will have shorter wait times as well as electronic signs with updated information on wait times to help them know the best time to come to the station."
